Fact Sheet 04

Schmetz Needles

Schmetz quality sewing machine needles have been manufactured to exacting standards since 1851, providing the uncompromising, consistent quality that produces the perfect stitch every time. The sewing machine needle is the most crucial element in the stitch forming process. No other needle manufacturer can match the amount of detail and quality of material that goes into each needle before it leaves the Schmetz factory.

	Universal Needles/10 Pack For all general sewing of most woven and knit materials. For use in all household sewing machine brands and types for which needles with a flat shank are required. Assorted sizes (4-70, 4-80, 2-90). Ten needles per card.
	Gold Titanium Embroidery Needle Slightly rounded point for embroidery on most fabrics. Enlarged eye accommodates special application threads. Titanium Nitride ceramic coating improves needle wear resistance in high stitch count applications and penetration of coarse or densely woven materials. Five needles per card. Sizes 75 & 90
	Universal Needles For all general sewing of most woven and knit materials. For use in all household sewing machine brands and types for which needles with a flat shank are required. Five needles per card. 8/60 10/70 12/80 16/100 9/65 11/75 14/90 18/110 19/120
	Ball Point Needles These needles have a medium ball point for use on knitted materials. Five needles per card. 10/70 12/80 14/90 16/100
	Denim Needles Has a sharp point for jeans and similarly densely woven materials. Five needles per card. 10/70 12/80 14/90 16/100 18/110
	Stretch Needles A medium ball point for synthetic suedes and elastic knitwear. The special construction prevents skipped stitches. Five needles per card. 11/75 14/90
	Quilting Needles Special taper to the point prevents damage to the sensitive, expensive materials used in quilting. Five needles per card. 11/75 14/90
	Machine Embroidery Needles For use with rayon and specialty machine embroidery thread. Five needles per card. 11/75 14/90
	Metallic Needles Provides trouble-free sewing with metallic threads. It has a large eye to make threading easier. It also has a large groove to prevent shredding of the delicate metallic threads during stitch formation. Five (5) needles per card. 12/80 14/90

	Microtex/Sharp Needles These needles have a sharp point for perfectly straight stitches. For use in topstitching or edge stitching applications on silk and microfiber fabrics. Five needles per card. 8/60 10/70 12/80 14/92
	Hemstitch Needles A single wing needle for decorative stitching on tightly woven fabrics. One (1) needle per card. HEM/100 HEM/120
	Leather Needles These needles have a slight cutting point for leather and heavy non-woven synthetics. Five needles per card. 12/80 14/90 16/100 18/110
	Topstitch Needles An extra sharp needle with an extra large eye and a large groove to accommodate topstitch thread. Should be used where a larger eye size is beneficial. Five needles per card. 12/80 14/90 16/100
	Overlock Needles Has a sharp point suitable for all fabrics. Two assorted sizes: BLX1 (2-11, 2-14) and DCX1 (2-11, 3-14). Choose system recommended by machine manufacturer. Five needles per card. Asst BLX1 Asst DCX1
	Double Eye Needle The special construction of the Double Eye needle is designed for use in topstitching with decorative threads to produce decorative seams. Size 80/12. Five needles per card. 80/12
	Double Hemstitch Needles One wing needle and one regular needle on a cross bar from a single shaft. For decorative stitching on tightly woven fabrics. One needle per card.
	Double Machine Embroidery Needles For use with rayon and specialty machine embroidery thread. Constructed with two needles on a cross bar from a single shaft. Sews two rows of decorative stitching at the same time. One needle per card. 2.0/75 3.0/75
	Double Denim Needles For jeans and similar densely woven materials. Constructed with two needles from a cross bar from a single shaft. Sews two rows of stitching at the same time. One needle per card. 4.0/100
	Double Metallic Needles Provides trouble-free sewing with metallic threads. It has a large eye to make threading easier. It also has a large groove to prevent shredding of the delicate metallic threads during stitch formation. Constructed with two needles on a cross bar from a single shaft. Sews two rows of decorative stitching at the same time. One needle per card. 2.5/80 3.0/90
	Twin Needles Constructed with two needles on a cross bar from a single shaft. Can be used with zig zag sewing machines that thread front to back. Sews two rows of stitching at the same time. One needle per card. 1.6/70 2.0/80 3.0/90 4.0/90 1.6/80 2.5/80 4.0/80 4.0/100
